EDUCATION

University of Texas at Austin
PhD in Computer Science

August 2026 - (planned)

University of California, Berkeley
B.S. in Electrical Engineering and Computer Sciences
Selected coursework: Reinforcement Learning, NLP, Computer Vision, Random Processes, Info Theory.

August 2021 - May 2025
GPA: 3.985/4.0

PUBLICATIONS

Multistep Quasimetric Learning for Scalable Goal-conditioned Reinforcement Learning.
B. Zheng, V. Myers, B. Eysenbach, S. Levine.
International Conference on Learning Representations (ICLR), 2026.

Offline Goal-Conditioned Reinforcement Learning with Quasimetric Representations.
V. Myers, **B. Zheng**, B. Eysenbach, S. Levine.
Conference on Neural Information Processing Systems (NeurIPS), 2025.

Temporal Representation Alignment: Successor Features Enable Emergent Compositionality in Robot Instruction Following.
V. Myers*, **B. Zheng***, A. Dragan, K. Fang, S. Levine.
Conference on Neural Information Processing Systems (NeurIPS), 2025.

Policy Adaptation via Language Optimization: Decomposing Tasks for Few-Shot Imitation.
V. Myers*, **B. Zheng***, O. Mees, S. Levine[†], K. Fang[†].
Conference on Robot Learning (CoRL), 2024.

THESAN-HR: Galaxies in the Epoch of Reionization in warm dark matter, fuzzy dark matter and interacting dark matter.
X. Shen, ..., **B. Zheng**.
Monthly Notices of the Royal Astronomical Society (MNRAS), 2023.

RESEARCH EXPERIENCE

Research Scientist Intern May 2026 - present
NVIDIA

Advised by Dr. Jim Fan and Prof. Yuke Zhu at Generalist Embodied Agent Research (GEAR). Currently working on Vision-Language-Actions Models (VLAs) and offline reinforcement learning (RL).

Undergraduate Student Researcher Jan 2024 - May 2026
Robotics, AI, and Learning Lab, UC Berkeley

Advised by Prof. Sergey Levine, Prof. Kuan Fang, and Prof. Benjamin Eysenbach. Worked on effective RL post-training for VLAs, representation learning for scalable goal-conditioned offline RL, and increasing adaptation efficiency for language-conditioned policies.

Undergraduate Student Researcher March 2023 - October 2023
Malik Group, UC Berkeley

Advised by Prof. Jitendra Malik and Ph.D. Student Ilija Radosavovic. Conducted research on sim-to-real

robot learning and in-context learning.

Visiting Researcher

October 2022 - April 2023

Massachusetts Institute of Technology

Advised by Prof. Mark Vogelsberger at MIT's physics department, and collaborated with Ph.D. student Jacob Shen at Caltech. Deployed code for L-1 regression for stellar mass detection.

AWARDS AND HONORS

NSF Graduate Research Fellowship Program, UT Austin

Graduated with High Honors, UC Berkeley College of Engineering

Dean's List, UC Berkeley

IEEE-HKN, UC Berkeley (Mu Chapter)

TEACHING

CS189/289A: Introduction to Machine Learning

Spring 2025

Served as the primary Ed correspondent and held office hours and homework parties in a class of 750 students. Created new teaching content for advanced discussions focused on current machine learning research and designed homework questions on transfer learning.

CS180/280A: Introduction to Computer Vision

Fall 2024

Graded projects, host office hours, assisted with discussion preparation, answered questions from Ed, and coordinated student logistics in a class of 300 students. Covered classical computer vision as well as generative models for computer vision (NeRF, Diffusion).

VOLUNTEERING

Reviewing: ICLR, NeurIPS

Mentorship: Computer Science Mentors, 2023-2025. Served as course co-coordinator for EECS 16B (now ELEN 66).

SKILLS

Languages Python, Java, C, C++.

Libraries NumPy, Jax, PyTorch, Tensorflow, ROS, Git, OpenCV.
